VISI PURCHASES INTERNET SERVICE PROVIDER INFINITY ACCESSNET

Business-Focused ISP Adds \$1 Million In Annual Revenue

MINNEAPOLIS, MN, March 18th, 2008 - VISI, Minnesota's largest managed hosting and connectivity provider, announced today that it has acquired privately-owned Infinity AccessNET, a business-focused Internet Service Provider. The transaction will keep ownership in local hands with VISI taking on the employees and customers of Infinity AccessNET.

"We're excited to have the talented employees from Infinity AccessNET join VISI," says Mike Sowada, CEO of VISI. "Customers will benefit from having a full range of knowledge and capabilities under one roof."

Infinity AccessNET's customer base of over 1,000 includes firms from small local businesses to Minnesota-based Fortune 500 corporations. This will add to the 10,000 businesses and residential customers that VISI already services.

"VISI has a great reputation in town," says Leon Schilmoeller, President of Infinity AccessNET. "After meeting with the management team at VISI, it was easy to see this as a great fit for our customers and employees."

Most employees of Infinity AccessNET will be moving into the new 50,000 square foot Eden Prairie facility that VISI purchased last month. This facility will serve as VISI's new headquarters and future data center location. Other employees will still be located at VISI's SAS 70 Type II data center located at 180 East 5th Street in downtown St. Paul.

About VISI:

Founded in 1994, VISI is Minnesota's largest locally-owned managed hosting and connectivity provider, offering connectivity, colocation and managed hosting services. VISI serves more than 10,000 business and residential customers throughout Minnesota with products and services including world-class SAS 70 Type II data centers in St. Paul and Minneapolis. The company provides a full range of robust Web and application hosting services, first-rate Internet services and support, and personal, expert advice. To learn more about VISI, call 612-395-9000 or visit www.visi.com.

About Infinity AccessNET:

Infinity AccessNET is a privately owned Internet service provider in the greater Twin Cities area, serving up business solutions since 1995. Infinity AccessNET is a one stop network solutions provider for small, medium, and large organizations; emphasizing Internet connectivity and LAN/WAN based applications. The company offers services that enable clients to plan and implement Internet, Extranet, Intranet, and E-business solutions while also offering support and management for every aspect of deployment and implementation.
